

sim·pli·fy

The complexity of managing members, achieving and maintaining compliance, and increasing revenue is a major challenge for our industry — and why MedHOK created its innovative software platform.

SIMPLIFY DATA

MedHOK is the only software that integrates all of a member's pharmacy and medical data, into one system, creating a 360° view of the member that the entire organization can use throughout the continuum of care. Abandon silos and manage your members in one system.

SIMPLIFY COMPLIANCE

Out-of-the-box compliant and proactively updated for Medicare, Medicaid, and Affordable Care Act regulations, compliance is built-in. Facing a CMS audit? MedHOK generates the necessary reports from multiple required areas in one command. Simple.

CONTROL OUTCOMES

With built-in best practices and structured workflows, MedHOK allows you to predict, identify, and target member health risks, intelligently trigger workflow interventions, improve quality of care, and positively impact revenue—and do so from a single platform.

CONTROL PERFORMANCE

MedHOK's software platform includes a comprehensive Business Intelligence Rules engine, which creates robust, on-demand reports, including standard and regulatory reports. Real-time dashboards quickly provide the status of key production statistics and success metrics.

SUCCEED WITH QUALITY

MedHOK delivers an end-to-end solution to meet all of the quality performance mandates, including year-round tracking of HEDIS, Star, Medicare Part C and D, Medicaid and other care gaps and quality measures.

SUCCEED WITH VALUE-BASED HEALTHCARE

MedHOK simplifies healthcare member management, removes the worry of compliance, and allows you to focus on achieving maximum revenue. That's a formula for success.
